

KETAN DEVRAJ

COMPUTER ENGINEER | FULL STACK DEVELOPER | PYTHON & AI PROJECTS

ketandevraj2405@gmail.com | GitHub | LinkedIn

SUMMARY

I am a Computer Engineering graduate who loves building clean, functional applications from scratch. I focus on Full Stack Development using Python, React, Flask, and SQL, and I've spent my time building hands-on projects with AI and Computer Vision. I enjoy tackling technical challenges, adapt fast to new technologies, and am eager to contribute to a development team by building practical software solutions.

EDUCATION

Dr. D. Y. Patil Institute of Engineering, Management & Research, Akurdi, Pune

2022 – 2026

Bachelor of Engineering (B.E.) in Computer Engineering (Savitribai Phule Pune University)

CGPA : 7.36

WORK EXPERIENCE

DevTechie

Feb 2025 – Apr 2025

Junior Web Developer Intern – Pune

- Built clean and responsive web pages using HTML, CSS, and modern UI structuring methodologies.
- Worked on fixing layout issues to make sure the website looks good and works well on different browsers.
- Handled day-to-day development tasks and helped write basic technical documentation for the team.

Wisdom Sprouts IT Training Hub

Dec 2024 – Feb 2025

Cybersecurity Intern – Pune

- Created a practical web security lab focused on simulating and testing IDOR vulnerabilities.
- Learned and applied common web application security and testing concepts.
- Used industry-standard security tools to test backend logic and find potential security flaws.

PROJECTS

AI-Based Fitness Trainer

Technologies Used: React.js, Python, MediaPipe, Computer Vision, LLM APIs

- Developed an AI-powered fitness ecosystem utilizing real-time Computer Vision and large language models for personalized training guidance.
- Integrated advanced pose estimation frameworks (MediaPipe) to track skeleton geometry and evaluate precise joint angles.
- Implemented an automated voice feedback mechanism that delivers immediate form corrections and execution tracking.

API Support Console

Technologies Used: Python, Flask, SQLite, REST APIs, HTML, CSS

- Engineered a high-performance web console to automate testing, invocation, and debugging processes across diverse REST API endpoints.
- Designed robust handling architectures for HTTP GET/POST requests alongside complex response payload analysis tools.
- Built a structural logging infrastructure to track critical runtime exceptions, accelerating operational debugging efficiency.

SKILLS

Programming Languages: Python, JavaScript, HTML, CSS

Web Frameworks : React.js, UIDesign, REST APIs, Flask

Databases & Storage: SQL, SQLite

Tools & Platforms: Git, GitHub, Postman, Power BI, MS Excel
